SUMMARY

Motivated and career-focused Computer Engineering graduate (2025) with strong problem-solving, teamwork, communication, and critical thinking skills. Committed to continuous learning and growth, with a clear focus on building a successful career in the tech industry. Known for being proactive, disciplined, and eager to take on challenges in a professional environment.

EDUCATION

Diploma in Information Technology

May - 2022

G . V . Acharya Polytechnique

Secondary School

March - 2018

Shishu Vikas High School

PROJECTS

IOT Based Gas Detector

Developed an IoT-based gas detector using [Arduino/ESP32] and MQ-series sensors to monitor hazardous gases in real-time. Enabled remote data transmission to a cloud platform for continuous monitoring and analysis. Enhanced safety by providing timely warnings for preventive action.

Face and Iris based Attendance System

Developed an IoT-enabled face and iris based attendance system using computer vision and biometric sensors to accurately identify individuals in real-time. The system captures facial and iris patterns, processes data locally, and transmits attendance records to a cloud platform for remote monitoring. Automated alerts and reports enhance attendance management and security in educational and corporate environments.

CERTIFICATION

Data Visualization

Power BI

INTERSHIP

AI-Based Content Curator Intern

Dec 2024 to Jan 2025

Next Leap Analytics

- Curated AI-generated content for educational and technical domains using AI tools.
- Collaborated with the team to enhance machine-generated outputs with human context.
- Gained experience in content analysis, topic modeling, and quality assurance.

SKILLS

- Language - English (Basic), Marathi, Hindi
- Computer - Word, Excel, PowerPoint
- Programming - Python (Basic)
- Soft Skills - Problem-solving, Quick learner, Time management
